Micro-box microfibre cloth

Micro-box is a new, semi-disposable ultrasonic-cut microfibre cloth supplied in a handy dispenser case.

The new, cost-effective and semi-disposable cloth perfectly fills the gap between disposable non-woven and reusable microfibre. Simply pull, use and reuse.

The cloth is made using an innovative, edgeless technology which means instead of being sewn the edges are ultrasonic-cut and fused to prevent fraying.

A 200gsm microfibre blend of polyester and polyamide, the cloth size is 30cm x 30cm, available in four colours and a case quantity of 8x50 box.

What is microfibre?

Microfibres have a thickness finer than 1/100 of a human hair. Each thread is split into around 16 micro segments by physical and chemical treatment. The fineness of microfibre means it has exceptional cleaning performance.

Key features & benefits

Microfibre
Cleaning

No chemicals
required

Semi-
disposable

Use damp
or dry

- Ultrafine and low-lint microfibre captures dirt from most surfaces.
- Suitable for intense cleaning environments that do not have laundry facilities.
- 50 cloths supplied in a handy dispenser box perfect for janitorial trolleys.
- Minimal water required and no need for chemicals to remove bacteria.
- Ultrasonic-cut edgeless technology prevents the cloth fraying.

Materials

86% polyester and 14% polyamide.

User instructions

Simply pull, use and reuse either dry or damp – damp for best results. Can be disposed of after use to prevent cross contamination.

Washing, care & maintenance

Do not use fabric conditioner.
