

PRODUCT USE GUIDE FOR

IMPACT

ANTIBACTERIAL HARD SURFACE CLEANER

D35

Product Description

A 3 in 1 cleaner designed to clean, sanitize and deodorise in one operation. Removes a wide range of soils from hard surfaces, leaving them clean and safe. Contains a light floral fragrance. Approved and tested against MRSA.

Not to be used in food preparation areas as tainting may occur.

Product Features

- Recent antimicrobial tests have proved that Cleenol Impact is highly effective against MRSA when used neat. It passes the Challenge Test with a contact time of 5 minutes.
- Staphylococcus aureus is a type of bacterium (germ) carried in the nose of 20 - 40% of normal healthy people, and is also commonly found on people's skin, usually without causing harm. However, in certain circumstances, particularly when the skin is broken, this germ can cause boils, wound and other infections. These do not normally spread to other people outside the hospital setting. Hospital patients, however, are more vulnerable to infection with S. aureus because they are unwell or may have surgical wounds.
- MRSA stands for methicillin-resistant staphylococcus aureus, some strains of which may be resistant to several antibiotics. MRSA behaves in the same way as ordinary S. aureus and does not cause different or more serious infections. However, infections with MRSA can be more difficult to treat as we have fewer antibiotics with which to treat them and sometimes suitable antibiotics cannot be swallowed and must be given by injection. For these reasons, there is concern about MRSA in hospitals and patients with MRSA may be isolated in side rooms or special wards, and strict precautions taken to prevent spread to others.

Direction for Use

- Disinfection and cleaning (light soiling): 1 part to 50 parts warm water.
- Disinfection and cleaning (heavy soiling): 1 part to 20 parts warm water.
- Effective against MRSA at room temperature.
- Use neat and leave for 5 minutes to ensure maximum effect.

For Use in Scrubber Driers

- Use rate: dilute 2% in warm water. Add to the detergent tank.

Storage

- Store in cool conditions away from direct sources of heat
- Avoid extremes of temperature
- Do not allow to freeze
- Ensure the cap is tightly fitted after use
- Keep out of reach of children
